

BUCKEYE UNION SCHOOL DISTRICT

BLUE OAK
ELEMENTARY
REOPENING PLAN

Re-Opening Overview

It is the goal of the Buckeye Union School District to reopen and remain open in a manner that adheres to State mandates and guidelines for preventing the spread of COVID19. The wellbeing of our students, employees, and families is of paramount importance as we meet the challenges of the pandemic.

The site will implement the recommendations of the El Dorado County Department of Public Health should the site have an outbreak. The community can anticipate that the response would be similar to that recommended by the [California Department of Public Health](#).

This plan will be updated should new guidance be provided by the California Department of Public Health in the future.

General Measures

The Buckeye Union School District has established and will continue communication with the El Dorado Public Health Department regarding disease levels and control measures in the communities of the Buckeye Union School District. We are also monitoring communications from the California State Department of Public Health and the California Department of Education. The District will continue to collaborate with the El Dorado County Office of Education and neighboring Districts regarding the operations of programs during this pandemic.

The principal of each school site has been designated to ensure implementation of the plan.

- In the event of an outbreak among students or employees, communication with the El Dorado County Public Health Department will be coordinated with the District Office.
 - This plan incorporates the [CDPH Guidance for the Use of Face Coverings](#). Requests for exemptions must be submitted to the school site principal for review and approval.
 - This plan will be reviewed and made available to all employees.
 - The plan will be amended if deficiencies are identified.
 - In the event COVID19 illness emerges, efforts will be made to determine if any work-related factors could have contributed to risk of infection and the plan will be updated as needed to prevent further cases.
 - The site will implement the recommended [CDPH processes and protocols](#) should the site have an outbreak.
 - The site will identify individuals who have been in close contact (within six feet for 15 minutes or more) of an infected person and take steps to isolate COVID19 positive person(s) and quarantine close contacts.
 - Adhering to these guidelines will be essential in order to prevent illnesses that may cause classrooms or the entire school to be temporarily closed or limited.
- A. Community use of the school site facility will be limited to the El Dorado County Charter Extended Day Program and they will adhere to the measures outlined in this plan.
- B. In the event that closures of classes, groups or entire facilities when persons associated with the facility or in the community become ill with COVID19 occurs, the affected groups will move to distance learning.
- C. District Nurses will continually review health concerns for students and create student health plans to identify and support students who may need additional accommodations or classroom and non-classroom

preparation as needed. Site health clerks will support the nurses with review of emergency cards and medical concerns that could require additional interventions and communicate concerns to the District Nurse. The District Nurse will communicate with district families regarding health concerns that may require accommodations or a new health plan from the District Nurse. Families are encouraged to contact the health office with additional medical information about their child that may not be known. Additional information from a treating physician may be beneficial to address specific concerns for a student. If your child has been identified as a close contact with someone who tested positive for COVID19, you may also be contacted by a El Dorado County Public Health staff member to share more information with you and to get information about your child's health. Groups who might be at increased risk of becoming infected or having unrecognized illness include the following:

- Individuals who have limited mobility or require prolonged and close contact with others, such as direct support providers and family members;
- Individuals who have trouble understanding information or practicing preventive measures, such as hand washing and physical distancing; and
- Individuals who may not be able to communicate symptoms of illness.
- Individuals who have a chronic illness or other underlying health concern that has been identified by a medical provider as being at greater risk.

Promote Healthy Hygiene Practices

Teach and reinforce washing hands, avoiding contact with one's eyes, nose, and mouth, and covering coughs and sneezes among students and staff.

- A. Foam sanitizer will be available in all offices, classrooms, lunch areas, and near play structures.
- B. Teachers, School Nurses, and Health Clerks shall provide developmentally appropriate instruction to students regarding the hygiene practices necessary to stem the spread of the virus.
- C. Teachers shall ensure all students disinfect their hands using hand sanitizer or wash their hands with soap and water, for 20 seconds, whenever entering and leaving the room.
- D. Students shall be taught and prompted to wash their hands using sanitizer or soap and water prior to eating, after coughing or sneezing, and before and after using the restroom.
- E. All service providers will model healthy hygiene practices for students including washing hands when entering the classroom.
- F. District nurses will communicate to families that it is strongly recommended that all students and staff be immunized each autumn against influenza unless contraindicated by personal medical conditions, to help:
 - Protect the school community
 - Reduce demands on health care facilities
 - Decrease illnesses that cannot be readily distinguished from COVID19 and would therefore trigger extensive measures from the school and public health authorities.
 - Reduce worries about the unknown potential effects of potential co-infection with COVID19 and influenza.

FACE COVERINGS

Face coverings must be used in accordance with [CDPH guidelines](#) unless a person is exempt as explained in the guidelines, particularly

in indoor environments, on school buses, and areas where physical distancing alone is not sufficient to prevent disease transmission.

- Cloth face coverings will be provided to all employees upon request. Non-surgical masks will be available in front offices.
- All students in grades 3-8 must wear a face covering. These will be available in the front office and in classrooms. Students in grades TK-2 will be strongly encouraged to wear a face covering.
- All employees must wear face coverings.
- All members of the public are required to wear a face covering when on the site. Face coverings must cover both the nose and mouth.
- Teachers will teach and reinforce use of face coverings, or in limited instances, face shields.
- Students and staff should be frequently reminded not to touch the face covering and to wash their hands frequently.
- Information will be provided to all staff and families in the school community on proper use, removal, and washing of cloth face coverings.
- People who are exempted from wearing a face covering will be provided the same access to the school site and classrooms as those who are wearing a face covering.
- Students and staff who are exempted from wearing a face covering should be encouraged to wear a plastic face shield. These will be provided by the District.

STUDENTS

| Age | Face Covering Requirement |
|---|------------------------------|
| Under 2 years old | No |
| 2 years old – 2nd grade | Strongly encouraged** |
| 3rd grade – High School | Yes, unless exempt |

**Face coverings are strongly encouraged for young children between two years old and second grade, if they can be worn properly. A face shield is an acceptable alternative for children in this cohort who cannot wear them properly.

- Persons younger than two years old, anyone who has trouble breathing, anyone who is unconscious or incapacitated, and anyone who is otherwise unable to remove the face covering without assistance are exempt from wearing a face covering.
- A face covering may be removed for meals, snacks, naptime, or outdoor recreation, or when it needs to be replaced, when physically distanced. When a face covering is temporarily removed, it may be placed in a clean paper bag (marked with the student’s name and date) or hung on a lanyard until it needs to be put on again.
- In order to comply with this guidance, schools must exclude students from campus if they are not exempt from wearing a face covering under CDPH guidelines and refuse to wear one provided by the school. Students who inadvertently fail to bring a face covering to school will be provided with one. The District will offer alternative educational opportunities for students who are excluded from campus to the extent practicable.
- All staff must use face coverings in accordance with CDPH guidelines unless Cal/OSHA standards require respiratory protection.
- In limited situations where a face covering cannot be used for pedagogical or developmental reasons, (i.e. teaching phonics or to

those who receive direct ELD support) a face shield, with drape, can be used instead of a cloth face covering while in the classroom as long as the wearer maintains physical distance from others. Staff must return to wearing a face covering outside of the classroom.

ENSURE EMPLOYEE SAFETY

- Ensuring staff maintain physical distancing from each other is critical to reducing transmission between adults.
- Ensure that all staff use face coverings in accordance with CDPH guidelines and Cal/OSHA standards.
- Conduct all staff meetings, professional development training and education, and other activities involving staff with physical distancing measures in place, or virtually, where physical distancing is a challenge.
- Minimize the use of and congregation of adults in staff rooms, break rooms, and other settings.
- Employees will complete a daily symptom screener.

Intensify Cleaning, Disinfection, and Ventilation

- School facilities and buses will be disinfected each day using electrostatic emitters with FDA approved cleaning solutions.
- Parents may supply their children with EPA approved cleaning wipes of their choice. The District is prohibited from providing cleaning wipes to students.

- HVAC systems will be set to maximize circulation of air from outside buildings.
- MERV13 air filters have been installed in all HVAC systems.
- Attempts will be made to limit use of shared objects/materials, when practical. When items must be shared in order to provide the typical education experience, hands will be washed with soap and water or disinfected using hand sanitizer before and after use.
- All drinking fountains will be turned off, and students will be encouraged to bring a water bottle that can be filled at a classroom sink.
- Hand sanitizing will be required prior to and after use of playground equipment.

Implementing Distancing Inside and Outside the Classroom

The District's facilities do not allow for implementation of physical distancing at 6 ft when all students are present. If a two track model, in which 50% percent of students are present each day, was implemented, then 17 students can be in a classroom with 5 ft. to 6ft. of separation between desks.

Transportation

- Bus Drivers will maximize space between students and between students and the driver on school buses and open windows to the greatest extent practicable.
- Buses will be equipped with extra unused face coverings on school buses for students who may have inadvertently failed to bring one.

Community Outreach

- Volunteers will not be permitted on sites.

- Parent meetings, including Back to School Night, parent teacher conferences, PTA meetings, IEP meetings, SST and 504 meetings will be held via video conferencing
- PTA events, such as, Boo Festival, Game Night and Family Dance will not take place

Groups and Events

- Sporting events, assemblies, dances, rallies, field trips, and other activities that require close contact or that would promote congregating are not permitted at this time.
- After school clubs will not take place on campus. If available, they may be held using a video conference platform
- Activities where there is increased likelihood for transmission from contaminated exhaled droplets such as band and choir practice and performances are not permitted.

Arrival to School

- In order to minimize contact at school between students, staff, families and the community the morning Bulldog Bark will not take place
- Student supervision begins at 7:40. Students should not arrive before that time.
- After arriving at school students will report to their grade level designated area.
- Parents who drop their student off by car will need to drop off at the front of the school and remain in their car, and then depart.
- Parents who walk their child to school will need to walk them to the flagpole (at the front) or top of the nature trail (at the back), and then allow their child to walk to their designated area.
- Parents of TK-1st grade may walk their child to the designated area, but may not congregate. Parents are required to wear masks at all times on campus. Parents must maintain the social distance of six feet from staff, students and other parents while on campus.

Dismissal from School

- Parents of kindergarten students will be allowed to wait at the front of the kindergarten classrooms while picking up their student from class. Parents of 1st grade students may wait at the front of the school by the flagpole at dismissal. Parents must wear masks and remain socially distanced.
- Parents who pick up students by vehicle will remain in their vehicles at the front circle.
- Parents who wish to walk home with their child will need to meet their child at the top of the nature trail or at the flagpole. Parents will not be allowed to congregate and should leave campus once their child(ren) has arrived.

Health Screenings

- Staff will complete a daily health screener at the start of their work day.
- Parents must monitor students for symptoms each day prior to coming to school.
- Teachers will complete a non verbal health screening during attendance. Any student showing signs or symptoms consistent with COVID-19, not related to another known health condition, will go to the health clerk for further screening.
- Health clerks and nurses will conduct spot checks throughout the day.

Classrooms

- To reduce possibilities for infection, students will remain in the same space and in cohorts as small and consistent as practicable, including for recess and lunch. Keep the same students and teacher or staff with each group, to the greatest extent practicable.
- Prioritize the use and maximization of outdoor space for activities where practicable.

- Avoid equipment sharing, and if unavoidable, clean and disinfect shared equipment between use to reduce the risk of COVID19 spread.
- Schedules will minimize movement of students and teachers or staff as much as practicable. Mixing among cohorts will be discouraged in order to minimize contact.
- Classrooms will maximize space between seating and desks. Distance teacher and other staff desks at least six feet away from student desks. Markings on classroom floors will be used to promote distancing. Desks will be arranged in a way that minimizes face-to-face contact.
- Activities will be redesigned for smaller groups and furniture and play spaces will be rearranged to the extent practicable, to maintain separation.
- Staff will maximize spacing and ways to minimize movement in both indoor and outdoor spaces that are easy for students to understand and are developmentally appropriate, such as floor/ground markings indicating directions
- Teachers will implement procedures for turning in assignments to minimize contact.
- Clear screens have been provided in TK-3 classrooms to increase and enforce separation between staff and students.

Office

- Due to the size of our front office, only one visitor at a time will be allowed in the office at a time.
- Visitors are required to wear masks, which will be provided if needed, and are encouraged to use the hand sanitizer prior to entering and after leaving.
- Parents are encouraged to call the office in advance if checking a student in late or out early, as this will help with socially distancing.
- Signage is posted outside of the office to remind parents, staff and students about mask requirements and distancing guidelines.

- Parents will not be allowed to deliver forgotten materials (homework, lunches, etc) to the classroom. They will need to be left at the front of the office.
- Students will be unable to use the phone in the office. Office staff will make phone calls for the students as needed.

Health Office

- Students sent to the health office will be met outside the office to have their temperature taken prior to entering.
- Students will receive basic first aid outside of the health clerk office.
- Any student with a fever will be further screened in an isolation room. Parents will be called immediately and must check their student out of school as soon as possible.
- Plans are in place to separate or isolate any student or staff that displays COVID-19 symptoms until they are able to leave campus.

Recess and Lunch

- Routes will be designated to help eliminate cross traffic in hallways when moving from classroom to playground.
- Portable hand sanitizers will be available on the playground, near the play structure and at the lunch tables.
- Each grade level will have their own play equipment which will be disinfected between recesses.
- Staff will encourage and promote social distancing during recess time.
- In the AM/PM Hybrid models students will not eat lunch at school. For nutrition breaks, students will be assigned to tables with their classmates and will be encouraged to space to the extent practicable.
- Grade levels will go out for recess one at a time. Each grade level will have their own play equipment which will be sanitized between recesses.

Limit Sharing

- Each child's belongings will be separated and in individually labeled storage containers, cubbies or areas. Personal belongings will be taken home each day to be cleaned.
- Ensure adequate supplies to minimize sharing of high-touch materials (art supplies, equipment, etc.) to the extent practicable or limit use of supplies and equipment to one group of children at a time and clean and disinfect between uses.
- Avoid sharing electronic devices, clothing, toys, books and other games or learning aids as much as practicable. Where sharing occurs, items will be cleaned and disinfected between uses.

Train All Staff and Educate Families

Training and regular communications regarding the following topics will occur:

- Sanitation practices
- Physical distancing
- Face coverings
- Screening practices
- COVID19 symptom identification
- Proper use, removal, and washing of cloth face coverings.

Signage will be posted throughout the site to remind students, employees, and the public of the practices that will minimize the possibility of COVID19 spreading on campuses.

Check for Signs and Symptoms

- Employees will attest daily that they do not have COVID19 or COVID19 like symptoms.
- Teachers will conduct verbal and visual wellness checks of students and see that students who do not appear well receive a temperature check by the health clerk or school nurse.
- Any confirmed or suspected cases of COVID19 will be immediately reported to the El Dorado County of Public Health.

COVID-19 Testing

The District will be offering surveillance testing to all employees every two months and on-site or community based testing will be available in the event a student or employee is exhibiting COVID-like symptoms. Testing of employees is voluntary and parent consent will be necessary in order for the District to test a student.

Plan for When a Staff Member, Child, or Visitor Becomes Sick

- Isolation rooms will be identified at each school site to separate anyone with symptoms of COVID-19.
- Any individual that requires isolation shall wear a face covering as they await transport to home or to a hospital.
- Parents are required to immediately pick students up who are displaying COVID-19 symptoms.

- Sites will coordinate with the District Office regarding the response to an individual with COVID19 or COVID19 like symptoms. The response protocol follows CDPH guidelines: [Click Here](#)

Considerations for Partial or Total Closure

In the event that COVID19 is confirmed on a school site, the El Dorado County Department of Public Health will be immediately contacted by the District Superintendent or a designee for guidance regarding the need for closure.

In general, decisions regarding closure will follow the [CDPH re-opening framework](#) and the guidance of the El Dorado County Public Health Officer.

In the event of a closure, teachers will be prepared to shift to providing Distance Learning that incorporates a combination of direct instruction and independent learning activities.
